VIELEN DANK FÜR DEN KAUF IHRES BRANDNEUEN MAZU-PRODUKTS!**

## **IMPORTANT SAFETY NOTICE – UNPLUG BEFORE ASSEMBLY**

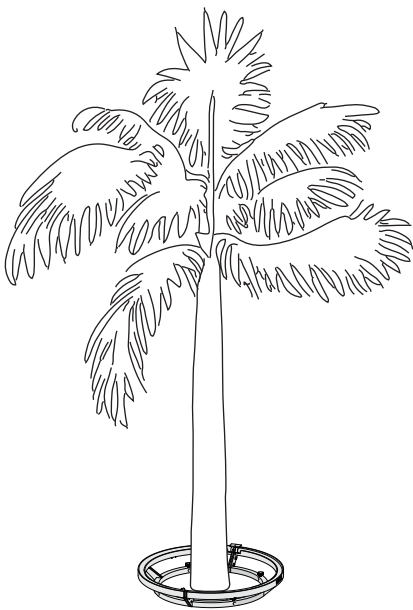

Before starting assembly, ensure that the product is **NOT** plugged into any power source.  
Working on the product while it is connected to electricity can result in serious injury or damage.  
Do not proceed with installation or assembly until you have confirmed the product is completely unplugged.  
Your safety is our top priority.

## **PROPER ASSEMBLY REQUIRED**

This product must be assembled according to the instructions provided in this guide.  
**While the model shown may differ slightly from yours, the assembly process is the same for all versions.**  
**The product is only rated IP65 if all cable glands and connections are screwed tightly.**  
Incorrect or incomplete assembly can lead to malfunction, safety hazards, and may cause product damage.

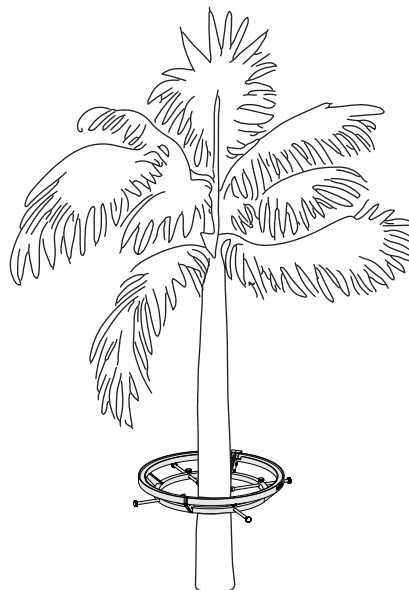

## **WARRANTY CONDITIONS**

The warranty will be voided if: 1. The product is not assembled as instructed, 2. Unauthorized modifications or parts are used  
3. The product is damaged due to misuse or improper handling  
Please read this guide carefully before starting assembly. If you have any questions or concerns, contact our customer support team.

### **360° Uplighting**

The Luminor can be placed on the ground around existing trees to create a refined, full-circle uplight that enhances the tree's natural structure.

### **Adjustable Height & Light Angles**

Installed at varying heights around the tree trunk, the Luminor provides flexible control over lighting angles and enhances the overall visual effect.

### **Easily Adaptable to Existing Planters**

The Luminor can be elegantly integrated into existing planters that do not feature built-in lighting.
